

About SPARC

Complementary and alternative medicine (CAM) research is thriving in Portland, a city that is home to Chinese medicine, chiropractic, naturopathic and Western medical schools. SPARC highlights current CAM research from local investigators and promotes scientific collaboration and knowledge sharing. The fifth annual symposium will focus on research in clinical practice.

Who Should Attend?

This symposium is ideal for those who want to deepen their understanding of CAM research or learn about current research findings from leaders in the CAM field. We encourage medical, naturopathic, osteopathic and chiropractic doctors, acupuncturists, nurses, allied health professionals, researchers and students to attend.

Keynote Speakers

Daniel C. Cherkin, PhD

Finding new inroads to healing is what drives Dan Cherkin's research. With chronic illness on the rise, he aims to show how primary care can evolve to more effectively deal with health problems that don't respond well to conventional treatments.

Karen J. Sherman, PhD, MPH

How can we harness the mind-body connection to enhance healing? An expert in complementary and alternative medicine, Karen Sherman investigates this question with a practical yet sophisticated approach—using rigorous epidemiological methods to test alternative therapies delivered in a manner consistent with real-world practice.

Drs. Cherkin and Sherman join us from the Group Health Research Institute in Seattle.

Participating Institutions

- Kaiser Permanente Center for Health Research
- Legacy Cancer Healing Center at Good Samaritan Hospital
- National College of Natural Medicine
- Oregon Collaborative for Integrative Medicine
- Oregon College of Oriental Medicine
- Oregon Health & Science University
- Portland State University
- University of Portland
- Western States Chiropractic College
